1. PRODUCT IDENTIFICATION

Company: REPSOL YPF Lubricantes y Especialidades, S.A.

Commercial name: REPSOL MOTO RACING 2T

Chemical name: Lubricant oil.

Synonyms: Lubricating oil with 100% raw material of synthesis for gasoline engines.

Molecular formula: Synthetic base stocks and additives.

CAS #: NP

Address: Glorieta del Mar Caribe N°1. 28043 Madrid

Tel#: 34 913489400

Fax#: +34 913483610

e-mail address: FDSRCPP@repsol.com

EC (EINECS)#: NP

Annex I (Dir. 67/548/EEC) #: NP

2. HAZARDS IDENTIFICATION

**PHYSICAL / CHEMICAL**

Lighter than water. It can obstruct sewers and water intakes.

Combustible.

**TOXICITY (SYMPTOMS)**

**Inhalation:** Short-term exposures to vapours and oil mists cause irritation of the respiratory tract. Long-term exposures can cause lung fibrosis preceded by broncho-pulmonary symptoms in concentrations over 5 mg/m³ (TLV).

**Ingestion/Aspiration:** Intestinal absorption is very low. Accidental intake of large amounts causes irritation of the gastrointestinal tract, nausea, vomiting and diarrhoea.

**Contact skin/eyes:** Low skin percutaneous toxicity in short-term exposures. Long-term exposures produce smarting, redness, irritation and dermatitis due to defatting of the keratyn layer. No skin sensitization has been registered in animal tests or human cases. Repeated exposure of eyes to vapours or liquid cause irritation.

**General toxic effects:** Mild irritation of skin and respiratory tract are the most common effects.

3. COMPOSITION

**General composition:** Additivated lubricant oil. Contains synthetic base stocks and specific additives.

4. FIRST-AID MEASURES

Inhalation: In case of inhalation remove the victim to fresh air. Administer oxygen if necessary. Call for medical attention.

Ingestion/Aspiration: Do not induce vomiting. If conscious have the victim drink water.

Contact skin/eyes: Flush with plenty of water and soap. In case of contact with eyes, flush with plenty of water during at least 15 minutes. Call for medical attention.

General measures: Call for medical attention.

5. FIRE-FIGHTING MEASURES

Extinguishing agents: Foams, dry chemicals, CO₂, water spray.

Non suitable extinguishing agents: Water applied directly may be ineffective due to dispersion of the material.

Combustion products: CO₂, H₂O, CO (in defect of air), SO₂, and zinc oxides.

Special measures: Not required.

Special hazards: NP

6. ACCIDENTAL RELEASE MEASURES

Environmental precautions: Hazard of physical fouling to coasts, soils, etc., due to low solubility and high viscosity of the oils. Avoid the material entering water intakes.

Cleanup methods: Treat as an accidental oil spill or leak; Avoid dispersion of the material with mechanical barriers. Remove with physical or chemical treatment.

Personal precautions: Avoid prolonged contact with contaminated clothes or with the product and inhalation of vapours and mists.

Personal protection: Suitable protective clothing, gloves and goggles should be worn during the clean up operation.

7. HANDLING AND STORAGE

Handling:

General precautions: Avoid prolonged contact and inhalation of mists and vapours from heated oils. During transfer avoid contact with air, use pumps and connections properly earthed to prevent generation of electrostatic charges. The contaminated air should be filtered before discharge.

Specific conditions: Safety goggles and gloves should be used. Do not weld or carry out any activity which could generate sparks in areas close to product storage. Do not weld in empty tanks without previous purging.

Storage:

Temperature and decomposition products: Carbon monoxide (toxic gas) and asphyxiants could be emitted at high temperatures by incomplete combustion.

Dangerous reactions: NP

Storage conditions: Containers properly labelled and sealed, placed in cool and well ventilated areas. Do not smoke, weld or do any work which can produce flames or sparks in storage area.

Incompatible materials: Strong oxidants.
8. EXPOSURE CONTROLS/PERSONAL PROTECTION

**Personal protection:**

*Eye protection:* Safety goggles to avoid splashes.

*Respiratory protection:* The product is slightly volatile at room temperature and does not present special risks. In presence of heated oils, wear protective masks to avoid vapour inhalation.

*Skin protection:* Gloves (polyethylene, polyvinyl chloride and neoprene; do not use neither natural nor butyl rubber)

*Other protective equipment:* Showers and eye-washers in the working area.

**General precautions:** Avoid prolonged contact and inhalation of mists and vapours from heated oils. Local exhaust ventilation should be installed to capture and remove emissions near to the point of generation.

**Specific hygiene measures:** Contaminated footwear should be discarded. Contaminated clothing should not be taken home for laundering. Regular changing of underwear is also important if penetration of outer clothing occurs. Disposable wipes should be used. Washing/Showering facilities with a non-solvent based skin cleaner, hot water and soap must be provided and used. Use skin reconditioning cream after work.

**Exposure controls:** TLV/TWA (ACGIH) = 5 mg/m3 (oil mist)

UK:OEL-TWA(COSHH):5mg/m3; OEL-STEIL:10mg/m3 [Oil mist]

---

9. PHYSICAL AND CHEMICAL PROPERTIES

**Appearance:** Visual: Transparent.

**pH:** NP

**Colour:** ASTM D-1500: 3

**Odour:** Lube oil

**Boiling point:** >400°C (ASTM 1160)

**Melting/Freezing point:** > -42°C max. (ASTM D-97)

**Flash point:** >200 °C min. (ASTM D-92)

**Autoignition temperature:** NP

**Explosive properties:** NP

**Oxidizing properties:** NP

**Vapour pressure:** <0.1 mm Hg at 25 °C

**Density:** 0.920 g/cm³ typical at 15 °C

**Surface tension:** NP

**Viscosity:** (100 °C) 18 cSt typical
(40 °C) 150 cSt typical

**Vapour density:** NP

**Partition coefficient (n-octanol/water):** NP

**Water solubility:** Insoluble

**Solubility:** Organic solvents.

**Other data:** NP

---

10. STABILITY AND REACTIVITY

**Stability:** Stable at room temperature.

**Conditions to avoid:** Exposure to open flames.

**Materials to avoid:** Strong oxidants react with oils and organic materials.

**Hazardous decomposition/combustion products:** Carbon monoxide (toxic gas) and asphyxiants could be emitted at high temperatures by incomplete combustion.

**Polymerization risk:** NP

**Conditions to avoid:** NP
### 11. TOXICOLOGICAL INFORMATION

**Routes of exposure:** Contact with skin, eyes and inhalation. Ingestion is not frequent.

**Acute and chronic effects:** No malignant acute effects are known. Irritation by contact with liquid and prolonged inhalation of vapours or oil mists are the most common effects.

**Carcinogenicity:** NP

**Reproductive toxicity:** No evidences.

**Medical conditions which increase hazard to exposure:** Respiratory tract deficiencies and dermatological problems.

### 12. ECOLOGICAL INFORMATION

**Pollutant potential:**

*Persistence and degradability:* The material is oily and viscous and floats on water. It presents a high physical fouling potential, mainly in sea-spills; by contact destroys small aquatic organisms and makes living difficult for upper organisms, not allowing the sunlight to reach underlying marine ecosystems, affecting its normal development. It is not readily biodegradable.

*Mobility/bioaccumulative potential:* There are no data to indicate that the product is significantly bioaccumulated by aquatic organisms or incidence in the trophic food chain, although it may cause long-term adverse effects in the aquatic environment, due to its high physical fouling potential.

**Ecotoxicological effects:** LL$_{50}$ (Lethal loading) $>$ 1,000 mg/l (lubricant base oils). Dangerous for aquatic life in high concentrations (spillages).

### 13. DISPOSAL CONSIDERATIONS

**Disposal methods (surplus):** Recycling and recovery of base oils when possible.

**Waste:** Liquids and solids from industrial process; do not attempt to clean containers since residue is difficult to remove; dispose in a safe way.

*Disposal:* Only in specific prepared and controlled areas. Avoid releasing waste oils to sewers because they can destroy water treatment plant micro-organisms.

*Handling:* Labelled and sealed containers. Avoid direct contact with waste oils.

*Provisions:* Companies which recover, dispose, store, transport or handle waste should comply with Dir. 2008/98/EC on waste, or other local, national or community provisions.
14. TRANSPORT INFORMATION

Special precautions: Stable at room temperature and during transport. Store in cool well ventilated areas.
