# REPSOL ZEUS GUIA 150

## 1. PRODUCT IDENTIFICATION

<table>
<thead>
<tr>
<th>Company: REPSOL YPF Lubricantes y Especialidades, S.A.</th>
<th>Commercial name: REPSOL ZEUS GUIA 150</th>
</tr>
</thead>
<tbody>
<tr>
<td>Address: Glorieta del Mar Caribe Nº1. 28043 Madrid</td>
<td>Chemical name: Lubricant oil.</td>
</tr>
<tr>
<td>Tel#: 34 913489400</td>
<td>Synonyms: Lubricant oil for machine tool guides.</td>
</tr>
<tr>
<td>Fax#: +34 913483610</td>
<td>Molecular formula: Complex mixture of hydrocarbons and additives.</td>
</tr>
<tr>
<td>e-mail address: <a href="mailto:FDSRCPP@repsol.com">FDSRCPP@repsol.com</a></td>
<td>CAS #: NP</td>
</tr>
<tr>
<td></td>
<td>EC (EINECS)#: NP</td>
</tr>
<tr>
<td></td>
<td>Annex I (Dir. 67/548/EEC) #: NP</td>
</tr>
</tbody>
</table>

## 2. HAZARDS IDENTIFICATION

### PHYSICAL / CHEMICAL

- Lighter than water. It can obstruct sewers and water intakes.
- Combustible.

### TOXICITY (SYMPTOMS)

- **Inhalation:** Short-term exposures to vapours and oil mists cause irritation of the respiratory tract. Long-term exposures can cause lung fibrosis preceded by broncho-pulmonary symptoms in concentrations over 5 mg/m³.
- **Ingestion/Aspiration:** Intestinal absorption is very low. Accidental intake of large amounts causes irritation of the gastrointestinal tract, nausea, vomiting and diarrhoea.
- **Contact skin/eyes:** Low skin percutaneous toxicity in short-term exposures. Long-term exposures produce smarting, redness, irritation and dermatitis due to defatting of the keratin layer. No skin sensitization has been registered in animal tests or human cases. Repeated exposure to vapours or liquid cause irritation.

**General toxic effects:** Mild irritation of skin and respiratory tract are the most common effects.

## 3. COMPOSITION

### General composition: Additivated lubricant oil. Complex combination of saturated hydrocarbons having carbon numbers in the range of C₁₅-C₅₀.

Base oil contains less than 2% PCA’s (DMSO extract according to IP346). Contains antioxidant, anticorrosion, antifoaming and EP.

4. FIRST-AID MEASURES

**Inhalation:** In case of inhalation remove the victim to fresh air. Administer oxygen if necessary. Call for medical attention.

**Ingestion/Aspiration:** Do not induce vomiting. If conscious have the victim drink water.

**Contact skin/eyes:** Flush with plenty of water and soap. Flush with plenty of water during at least 15 minutes. Call for medical aid.

**General measures:** Call for medical attention.

5. FIRE-FIGHTING MEASURES

**Extinguishing agents:** Foams, dry chemicals, CO₂, water spray.

**Non suitable extinguishing agents:** Water applied directly may be ineffective due to dispersion of the material.

**Combustion products:** CO₂, H₂O, CO (in defect of air), SO₂, and phosphorus oxides.

**Special measures:** Not required.

**Special hazards:** NP

**Protective equipment:** Heat-resistant suit and gloves. Self-contained breathing apparatus.

6. ACCIDENTAL RELEASE MEASURES

**Environmental precautions:** Hazard of physical fouling to coasts, soils, etc, due to low solubility and high viscosity of the oils. Avoid the material entering water intakes.

**Personal precautions:** Avoid prolonged contact with contaminated clothes or with the product and inhalation of vapours and mists.

**Cleanup methods:** Treat as an accidental oil spill or leak; Avoid dispersion of the material with mechanical barriers. Remove with physical or chemical treatment.

**Personal protection:** Suitable protective clothing, gloves and goggles should be worn during the clean up operation.

7. HANDLING AND STORAGE

**Handling:**

*General precautions:* Avoid prolonged contact and inhalation of mists and vapours from heated oils. During transfer avoid contact with air, use pumps and connections properly earthed to prevent generation of electrostatic charges. The contaminated air should be filtered before discharge.

*Specific conditions:* Safety goggles and gloves should be used. Do not weld or carry out any activity which could generate sparks in areas close to product storage. Do not weld in empty tanks without previous purging.

**Storage:**

*Temperature and decomposition products:* Carbon monoxide (toxic gas) and asphyxiants could be emitted at high temperatures by incomplete combustion.

*Dangerous reactions:* NP

*Storage conditions:* Containers properly labelled and sealed, placed in cool and well ventilated areas. Do not smoke, weld or do any work which can produce flames or sparks in storage area.

*Incompatible materials:* Strong oxidants.
8. EXPOSURE CONTROLS/PERSONAL PROTECTION

**Personal protection:**

**Eye protection:** Safety goggles to avoid splashes.

**Respiratory protection:** The product is slightly volatile at room temperature and does not present special risks. In presence of heated oils, wear protective masks to avoid vapour inhalation.

**Skin protection:** Gloves (polyethylene, polyvinyl chloride and neoprene; do not use neither natural nor butyl rubber)

**Other protective equipment:** Showers and eye-washers in the working area.

**General precautions:** Avoid prolonged contact and inhalation of mists and vapours from heated oils. Local exhaust ventilation should be installed to capture and remove emissions near to the point of generation.

**Specific hygiene measures:** Contaminated footwear should be discarded. Contaminated clothing should not be taken home for laundering. Regular changing of underwear is also important if penetration of outer clothing occurs. Disposable wipes should be used. Washing/Showering facilities with a non-solvent based skin cleaner, hot water and soap must be provided and used. Use skin reconditioning cream after work.

**Exposure controls:** TLV/TWA (ACGIH): 5mg/m$^3$

UK: OEL-TWA (COSHH): 5mg/m$^3$; OEL- STEL: 10mg/m$^3$ [Oil mist]

---

9. PHYSICAL AND CHEMICAL PROPERTIES

**Appearance:** Visual: transparent and brilliant.

**pH:** NP

**Colour:** <4.0 (ASTM D-1500)

**Odour:** Lube oil

**Boiling point:** > 400 °C (ASTM 1160)

**Melting/Freezing point:** > -9 °C max. (ASTM D-97)

**Flash point:** >225 °C min. (ASTM D-92)

**Autoignition temperature:** NP

**Explosive properties:** NP

**Oxidizing properties:** NP

**Vapour pressure:** < 0.1 mm Hg at 25 °C

**Density:** 0.8930 g/cm$^3$ typical at 15 °C (ASTM D-4052)

**Surface tension:** NP

**Viscosity:** (100 °C) 15.2 cSt typical (ASTM D-445)

(40 °C) 150 cSt typical (ASTM D-445)

**Vapour density:** NP

**Partition coefficient (n-octanol/water):** NP

**Water solubility:** Insoluble

**Solubility:** Organic solvents.

**Other data:** Fire point: 220 °C min. (ASTM D-92)

---

10. STABILITY AND REACTIVITY

**Stability:** Stable at room temperature.

**Conditions to avoid:** Exposure to open flames.

**Materials to avoid:** Strong oxidants react with oils and organic materials.

**Hazardous decomposition/combustion products:** Carbon monoxide (toxic gas) and asphyxiants could be emitted at high temperatures by incomplete combustion.

**Polymerization risk:** NP

**Conditions to avoid:** NP
## 11. TOXICOLOGICAL INFORMATION

**Routes of exposure:** Contact with skin, eyes and inhalation. Ingestion is not frequent.

**Acute and chronic effects:** No malignant acute effects are known. Irritation by contact with liquid and prolonged inhalation of vapours or oil mists are the most common effects.

- \(L_D_{50}>15\text{ g/Kg (oral-rat)}\)
- \(L_D_{50}>5\text{ g/Kg (skin-rat)}\)

**Carcinogenicity:** Base oil: IARC classification: **Group 3** (The agent is not classifiable as to its carcinogenicity to humans)

**Reproductive toxicity:** No evidences.

**Medical conditions which increase hazard to exposure:** Respiratory tract deficiencies and dermatological problems.

## 12. ECOLOGICAL INFORMATION

**Pollutant potential:**

*Persistence and degradability:* The material is oily and viscous and floats on water. It presents a high physical fouling potential, mainly in sea-spills; by contact destroys small aquatic organisms and makes living difficult for upper organisms, not allowing the sunlight to reach underlying marine ecosystems, affecting its normal development. It is not readily biodegradable.

*Mobility/bioaccumulative potential:* There are no data to indicate that the product is significantly bioaccumulated by aquatic organisms or incidence in the trophic food chain, although it may cause long-term adverse effects in the aquatic environment, due to its high physical fouling potential.

**Ecotoxicological effects:** \(L_L_{50}\) (Lethal loading)\(>1,000\text{ mg/l (lubricant base oils). Dangerous for aquatic life in high concentrations (spillages).}\)

## 13. DISPOSAL CONSIDERATIONS

**Disposal methods (surplus):** Recycling and recovery of base oils when possible.

**Waste:** Liquids and solids from industrial process; do not attempt to clean containers since residue is difficult to remove; dispose in a safe way.

*Disposal:* Only in specific prepared and controlled areas. Avoid releasing waste oils to sewers because they can destroy water treatment plant microorganisms.

*Handling:* Labelled and sealed containers. Avoid direct contact with waste oils.

*Provisions:* Companies which recover, dispose, store, transport or handle waste should comply with Dir. 2008/98/EC on waste, or other local, national or community provisions.
14. TRANSPORT INFORMATION

**Special precautions:** Stable at room temperature and during transport. Store in cool well ventilated areas.

**Additional information:**

- UN Number: NP
- ADR/RID: Not classified
- Hazard identification number: NP
- IATA-DGR: Not classified
- Proper shipping name: NP
- IMDG: Not classified

15. REGULATORY INFORMATION

**CLASSIFICATION**

NP

**LABELLING**

- Symbols: NP
- Phrases R: NP
- Phrases S: NP

Other regulations: NP

16. OTHER INFORMATION

**Data Bases consulted**

- EINECS: European Inventory of Existing Commercial Substances.
- TSCA: Toxic Substances Control Act, US Environmental Protection Agency
- RTECS: US Dept. of Health & Human Services

**Legislation consulted**

- Globally Harmonized System of Classification and Labelling of Chemicals (GHS).
- Dir. 67/548/EEC about classification, labelling and packaging of dangerous substances (including amendments and adaptations in force).
- Dir. 1999/45/EC about classification, labelling and packaging of dangerous preparations (including amendments and adaptations in force).
- Dir. 91/689/EEC dangerous waste; Dir. 2008/98/EG waste management.
- Royal Decree 363/95: Regulation about notification of new substances and classification, packaging and labelling of dangerous substances.
- Royal Decree 255/2003: Regulation about classification, packaging and labelling of dangerous preparations.
- European Agreement concerning the international carriage of dangerous goods by road (ADR).
- Regulation on the international transport of dangerous goods on the railway. (RID)
- International maritime code of dangerous goods. (IMDG)
- International Air Transport Association (IATA) regulation pertaining to air shipment.

**Glossary**

- CAS: Chemical Abstract Service
- IARC: International Agency for Research on Cancer
- ACGIH: American Conference of Governmental Industrial Hygienists.
- TLV: Threshold Limit Value
- TWA: Time Weighted Average
- STEL: Short-term Exposure Level
- REL: Recommendable Exposure Limit
- PEL: Permissible Exposure Limit
- INSHT: Instituto Nal. de Seguridad e Higiene en el Trabajo
- VLA-ED: Valor Límite Ambiental – Exposición Diaria
- VLA-EC: Valor Límite Ambiental – Exposición Corta
- LD₅₀: Lethal Dose Medium
- LC₅₀: Lethal Concentration Medium
- EC₅₀: Effective Concentration Medium
- IC₃₀: Inhibitory Concentration Medium
- BOD: Biological Oxygen Demand
- NP: Not Pertinent
